### DETAILED ACTION

1. Due to amendments by applicant, the previous 112 2<sup>nd</sup> ¶ rejections of record have been overcome and are hereby withdrawn.

#### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter that was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. While applicant states in the Remarks that support for the claim amendments may be found throughout the specification as filed, the Examiner finds no support for the limitation to the present process wherein the macromonomer is required to be prepared in the absence of a chain transfer agent. Applicant has failed to point out where exactly such support may be found in the originally filed specification.

Art Unit: 1713

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Huybrechts et al., for reasons cited in the previous Office action.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1-12 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, 35 U.S.C. 103(a) as being unpatentable over Yamamoto et al., for reasons cited in the previous Office action.

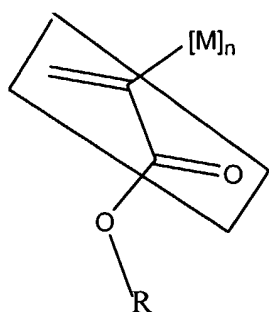

***Response to Arguments***

8. Applicant's arguments filed 03/08/2004 have been fully considered but they are not persuasive.

Art Unit: 1713

9. Firstly, with regard to Huybrechts et al., since no requirement for oligomerization of the macromonomer in the absence of a chain transfer agent is found in the originally filed description of the invention, this new limitation is treated as new matter and not given weight in evaluating the originally filed invention as it relates to prior art. The rejections based on Huybrechts et al. are maintained.

10. Regarding Yamamoto et al., contrary to applicant statements, if X in the formula of the present Claim 1 is a carbonyl containing moiety, such as -COOR or -CONR<sub>2</sub>, then the formula would represent an ethylenically unsaturated group which is an acryloyl

group, i.e.,

. As such, the rejections based on Yamamoto et al. are maintained.

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 1713

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
